INTERNAL FIT-OUTS AND REFURBISHMENTS

ARMOURY | AMMUNITION STORAGE | SCIF | SECURE ROOM | GUARD ROOM

Our High Security Fit-out and Room Refurbishments seamlessly integrate advanced security measures into already existing structures for armouries, secure storage, government facilities, corporate offices, and research environments.

We deploy cutting-edge security systems, access controls, and surveillance technologies to fortify spaces without compromising aesthetics, balancing security, and functionality.

//// BENEFITS:

+ Fit-outs create an effect use of pre-existing and often unsuitable infrastructure
+ Can include modular standalone rooms, secure bulkhead partitions and full room fit-outs
+ All materials are manufactured off-site, reducing on-site interference
+ Fit-outs still incorporate acoustically rated materials, full electrical infrastructure and air-management systems

//// FEATURES:

+ Makes use of and makes suitable, pre-existing infrastructure
+ Like all BeaverFit High-Security solutions, fit-outs can still include:
  + Acoustically rated materials
  + Full electrical infrastructure
  + Air-management systems, air-conditioning and dehumidification
  + Power filtering, radio frequency shielding, EMI/EMP protection, faraday caging and UPS systems
  + Unistrut securing systems
