MODULAR BUILD

ARMOURY | AMMUNITION STORAGE | SCIF | SECURE ROOM | GUARD ROOM

Our High Security modular solutions house a secure envelope within the modular construction.

The exterior façade of the building is made to look like any normal modular building.

Our modular solutions offer custom sizes and multi-floored capability. Though it deliverers a more permanent solution all our modular facilities are designed to be movable if required.

The interior can be designed for a variety of uses, configurations and zonal secure areas.

//// BENEFITS:

+ Building manufactured off-site prior to on-site delivery and installation. This significantly reduces on-site interference compared to traditionally built infrastructure
+ Relocatable infrastructure
+ Building size is not dictated by pre-set ISO-container dimensions
+ Includes full electrical infrastructure. All external electrical infrastructures are IP67 rated
+ Optional communication protection

//// FEATURES:

+ On-site interference reduced significantly compared to traditionally built infrastructure
+ Building size is not dictated by pre-set ISO-container dimensions
+ Raised access flooring, ensuring safe and effective cable management
+ Includes air-management systems, air-conditioning, heating and dehumidification to ensure a comfortable working environment
