

AUTRON TACTICAL CATCHER

LIVE FIRE RANGES AND SHOOT HOUSES

The Autron Tactical Catcher is a live-fire training system designed for realistic, close-range engagements in confined and demanding environments. With a minimum engagement distance of 1 cm and engagement angles as low as 6 degrees, it enables highly flexible, dynamic training.

Designed for deployment, the ATC features heavy-duty wheels and a secure locking mechanism for quick repositioning as scenarios evolve. Lightweight, weatherproof and easy to maintain, it can be transported and reconfigured worldwide by land, sea or air.

Well suited to urban training, Close Quarter Marksmanship and Close Quarter Combat, the ATC can also integrate into existing range infrastructure to enable additional marksmanship serials while reducing maintenance requirements.

//// BENEFITS:

+ Zero backsplash
+ Compatible with all munition natures up to 7.62mm
+ Re-deployable at ease
+ User maintenance friendly

//// FEATURES:

+ AR500 steel inner
+ Ballistic rubber, no ricochet tiling system
+ Quick release latch to split into two parts for ease of transportation
+ Ply wooden shroud to minimise potential ricochet
